When do you choose to plug in?

0 to 120gCO₂/kWh

200 to 380gCO₂/kWh

1 kWh charges approximately 200 phones

When 200 people choose **green** over **red**
we avoid a minimum of 80g of CO₂e

200 decisions - 80g CO₂e

2000 decisions – 800g CO₂e

every working day – 208kg CO₂e

254 kg CO₂e avoided per day

92 tonnes CO₂e avoided per year

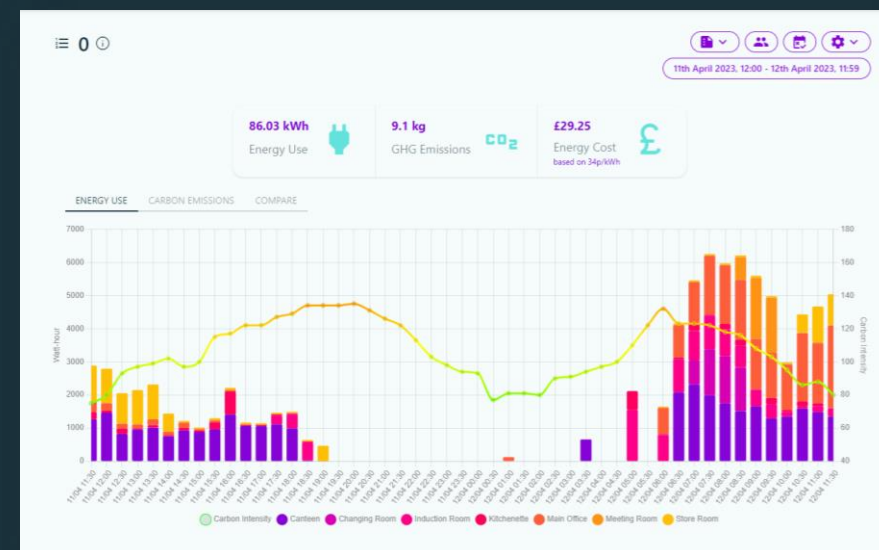

635,640 people in **Glasgow**

Automatically **Identify** and **eliminate** small power wasted **energy** reducing energy usage, emissions and cost.

- **Monitor** energy usage and emissions in real-time
- **Control** individual and groups of sockets
- **Detect** device types and power anomalies
- **Protect** against unwanted devices
- **Automate** energy and emissions reporting
- **Balance** with DSR incentivised energy use
- **Heal** with energy behavioural change

60% reduction in
small power energy
costs in modular
buildings

42% reduction in
emissions, 35%
reduction in small
power energy cost

36% reduction in small
power costs and
emissions

Certificate of Achievement

This item flew into space aboard the Endeavour on Friday, April 8, 2022, from Pad 39A as Mission Specialist Pilot Larry Connor, and Mission Specialist becoming the first to

Endeavour spent over 17 days in space, traveling at nearly 17,500 mph for over 7

Launch22

Friend of m.e and commander of Ax-1 carried our launch badge to the ISS. The mission launched from NASA's Kennedy Space Center on 8 April 2022 for 17 days.

Ax-1 was the first private crew mission to the ISS and focused on conducting 25 experiments.
