UNLOCKING THE WAY TO NET ZERO

ScottishPower supporting mass roll-out

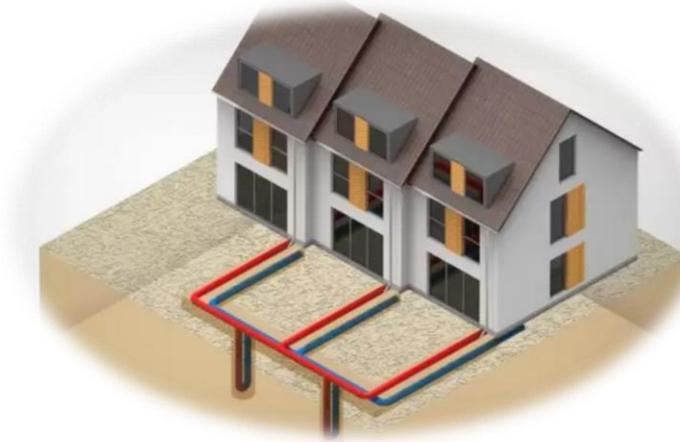

Established to **grow a heat network business**

Borehole(s) shared between multiple properties

Will **finance, construct, own, operate** and **maintain** the shared ground array assets for their lifetime

KEY RELATIONSHIPS

Local Authorities, Housing Associations, Landlords, Builders, House/Land Developers

NETWORK PROPOSITION

Customer will pay **an annual fee** for access to the shared infrastructure

GSHP for **every property** providing 100% domestic space heating, hot water and cooling needs all year round

Low **servicing** needs

Low running costs, producing c4 times more energy than it consumes

CUSTOMER PROPOSITION

Customer will pay for heat via **electricity bill** and evergreen **service plans**

FUTURE-PROOFING WITH INNOVATION

- **Air Source Heat Pumps** – Active in the market NOW!
- **Ground Source Heat Pumps** – Developing solutions for ground source heat networks and installations
- **Heat Pump Ready initiative** – reducing barriers to mass roll-out
- **Evergreen Service Plans** – available for low carbon heat solutions
