

## **PRESS RELEASE**

**For immediate release:** 21 June 2011

### **FUGRO'S EXPERT SHOWCASES AT OFFSHORE WIND 2011**

With 35 years' experience in the marine industry, the Fugro Renewables team has much to share with delegates at Offshore Wind 2011 (29-30 June, Arena and Convention Centre - ACC, Liverpool). Not only will they be highlighting their expertise on stand 177, but also holding two highly relevant showcases led by their technical experts.

Both showcases will be held on Wednesday 29 June at the Jurys Inn Hotel alongside the ACC. The first, being held 11.30-12.30, looks at new and innovative Fugro services that will aid in the development, planning and design of offshore marine renewable projects; and the second (13.30-14.30) homes in on technical solutions for foundation installation and construction support services for the life of offshore renewable projects. A networking buffet lunch, to which those attending either session are invited, is being held at the Hotel 12.45-13.15.

Registration is via email to [renewables@fugro.com](mailto:renewables@fugro.com), or calls to Fugro Renewables on +44 (0)1491 620800 – there are only 50 seats available for each session and they will be allocated on a first-come-first-served basis.

“We have already proved our worth to over 50 marine renewables clients working on more than a hundred projects, and are well set to take on more challenges with cost-effective, innovative and highly relevant solutions,” says Tony Hodgson, Global Business Development Manager, Fugro Renewables, established to bring together the expertise of operating companies within the Fugro Group to serve the renewables industry globally.

“These two sessions will highlight our expertise in particular areas – we are looking forward to two packed and stimulating sessions, and to welcoming delegates, visitors and fellow exhibitors to our stand (177) at Offshore Wind 2011.”
