# Developing with Nature - core principles

- Consider biodiversity from the outset
- Apply the mitigation hierarchy
- Provide synergies and connectivity for nature
- Integrate nature to deliver multiple benefits
- Take a place-based and inclusive approach
- Prioritise on-site enhancement before off-site
- Ensure long term enhancement is secured
- Additionality / no 'double-counting'

# Delivering the ambition:

- View every plan and decision through a climate and nature lens.
- Deliver change in the long term public interest.
- Have a learning mindset, share skills, learning and expertise.
- Work collectively and collaboratively to drive change together.
- Be bold!
